## About me

I am a highly motivated and results driven economist who has an education in theoretical and empirical economics with invaluable experience in research and financial risk management. My expertise is in the area of banking and financial regulations with a particular focus on model risk management, governance and credit risk modeling. I am skilled in credit risk model development, validation and methodology design under various regulations including ECB Guidelines, Basel II and IFRS9. I have experience in leading end to end development of complex model risk solutions.

## Skills
